

ALOK KUMAR JAIN

Data Analyst · Business Intelligence · AI & Copilot Tools

Raipur, Chhattisgarh · smartalok123@gmail.com · +91-9238451118

About Me

I have been working with data for over 17 years across four different industries — automotive sales, FMCG distribution, telecom, and business operations. What started as managing business records evolved into building dashboards, automating reports, and using Python and SQL to find answers that spreadsheets could not. I currently work as a Data Analyst at Balaji Auto Sales where I look after all reporting, MIS, and Power BI work. I also stay up to date with AI tools — I hold Microsoft certifications in Copilot, AI concepts, and cloud services, and I use ChatGPT and Claude regularly in my day-to-day work.

What I Work With

Analysis & Data:	Python (pandas, NumPy), SQL / MySQL, Excel (Power Query, Pivot Tables, VLOOKUP, XLOOKUP, advanced formulas)
Dashboards:	Power BI — data modeling, DAX, drill-through reports, Power BI Service (workspaces, publishing, refresh)
AI Tools:	Microsoft 365 Copilot, Copilot in Excel, ChatGPT, Claude
Reporting:	MIS Reports, ERP systems, Google Sheets, automated reporting workflows
Other:	Data validation, data cleaning, business operations, sales analytics

Work Experience

Data Analyst | Balaji Auto Sales | January 2023 – Present | Raipur

- Look after all data analysis and business reporting for the organization, covering sales performance, operational data, and management reporting.
- Built and maintain Power BI dashboards that give management a real-time view of sales and operations — replaced several manual reports that used to take days to prepare.
- Cut reporting turnaround time by around 30% by automating recurring reports in Excel and Python.
- Manage a dataset of 10,000+ records — handle cleaning, validation, and quality checks to make sure the numbers management sees are reliable.
- Write SQL queries and Python scripts for data extraction, transformation, and deeper analysis.
- Manage business data in the ERP system and keep operational records accurate and up to date.
- Use AI tools including ChatGPT, Claude, and Microsoft Copilot to speed up research, scripting, and reporting tasks.

Business Owner – FMCG Distribution | Self-employed | 2018 – 2023 | Raipur

- Ran all aspects of an FMCG distribution business — operations, inventory, supplier relationships, and customer accounts.
- Tracked sales performance and demand patterns through self-built reports, which helped with purchasing decisions and reduced excess stock.
- Maintained financial records and prepared business reports for internal decision-making.

Sales Manager | Balaji Auto Sales | 2012 – 2018 | Raipur

- Led the sales team and managed customer relationships for an automotive dealership.
- Built and maintained sales tracking systems and performance reports for management review.
- Consistently met sales targets through structured planning and regular performance monitoring.

Telecom Franchisee Partner | BSNL | 2009 – 2012 | Raipur

- Managed franchise operations covering customer service, sales, and telecom product distribution.
- Maintained customer records and prepared operational reports for the franchisee office.

Projects

Sales Performance Dashboard · *Power BI, DAX, Power BI Service*

- Built an executive-level Power BI dashboard on 50,000+ records covering revenue, profit, and monthly trends by region and product. Published to Power BI Service for remote access by management.
- Set up drill-through navigation and DAX measures that let managers go from summary to transaction level in seconds — replaced a weekly manual Excel report.

Invoice Analytics Tool · *Python, Plotly, Dash, PyInstaller*

- Built a standalone invoice analytics application with 8 chart types, KPI cards, and filters for date, city, and customer. Packaged as a Windows EXE for easy distribution.

Customer & Marketing Data Analysis · *Python, SQL, Power BI*

- Analyzed customer retention patterns and marketing campaign performance using Python and SQL. Built Power BI visuals that helped identify which campaigns were actually converting.
